

Microsoft Dynamics AX/D365 Senior Production Consultant

Position Summary:

The Microsoft Dynamics AX Senior Production Consultant is responsible for consulting on Microsoft Dynamics AX projects including implementations, upgrades, and/or extension of existing applications. This position is also responsible for the hands-on configuration of Microsoft Dynamics AX Production modules, as well as assisting clients in the implementation and support of their Microsoft Dynamics AX solutions. Additional responsibilities include helping improve operational metrics, business case development and performance measurement. The Senior Consultant will provide functional knowledge and manage client relationships within the context of individual roles.

Minimum Requirements:

- Four years of Microsoft Dynamics AX production experience
- Three years of Microsoft Dynamics AX implementation experience
- Two full Microsoft Dynamics AX implementations (Analysis through Deployment)
- Five years of manufacturing industry and/or consulting experience
- Certification in Microsoft Dynamics AX Production or Lean
- Certification in at least one other Microsoft Dynamics AX module
- Strong industry experience within complex and discrete manufacturing, including machining, and engineering design
- Strong knowledge of production resource scheduling, including fabrication, route, resources, costing groups, labor, operations, formula BOM, work centers, resource consumption and sub-contracting processes/services
- Working knowledge of manufacturing industry best practices
- Excellent communication, planning and organization skills
- Strong customer relationship skills

Desired Qualifications:

- Microsoft Dynamics AX 2012 experience
- Bachelor's degree in Supply Chain Management, Operations Management or related field
- Microsoft Dynamics AX Master Certification
- Microsoft Sure Step Certification
- Experience with other Microsoft Dynamics AX Modules
- APICS CPIM or CSCP

Responsibilities:

- Ensuring Customer Satisfaction
- Successful implementation of practical business solutions using industry and HSO best practices
- Facilitating the implementation and support of Microsoft Dynamics AX Production modules
- Designing, configuring and testing of core Microsoft Dynamics AX Production modules
- Working with customers to understand their business requirements and conduct gap analysis
- Converting requirements to functional specs and functional design documents
- Communicating effectively in all mediums and to all levels within the organization

Additional Information:

- Ability to establish priorities and work independently
- Ability to travel up to 80%
- Bachelor's Degree
- English: Fluent
- Must possess a valid Driver's License
- Full-time, virtual office-based position
